Really great job. Can't say I enjoyed the class but your discussions were really good. I think especially at office hours you were one of the few IAs who really understood the material and projects.

Sometimes there was just too much material to cover in the given time so he had to rush which made it hard to understand things sometimes.

He was very good. I sometimes went to the labs of Max and Issa as well. All three were very good at explaining the material and were fun people.

You help me a lot while some of the other ta really sucks

Pretty Good
